The Met Hotel

设计师: Zeppos-Georgiadis & Associates

项目地点: 希腊塞萨洛尼基

项目摄影: Vaggelis Paterakis

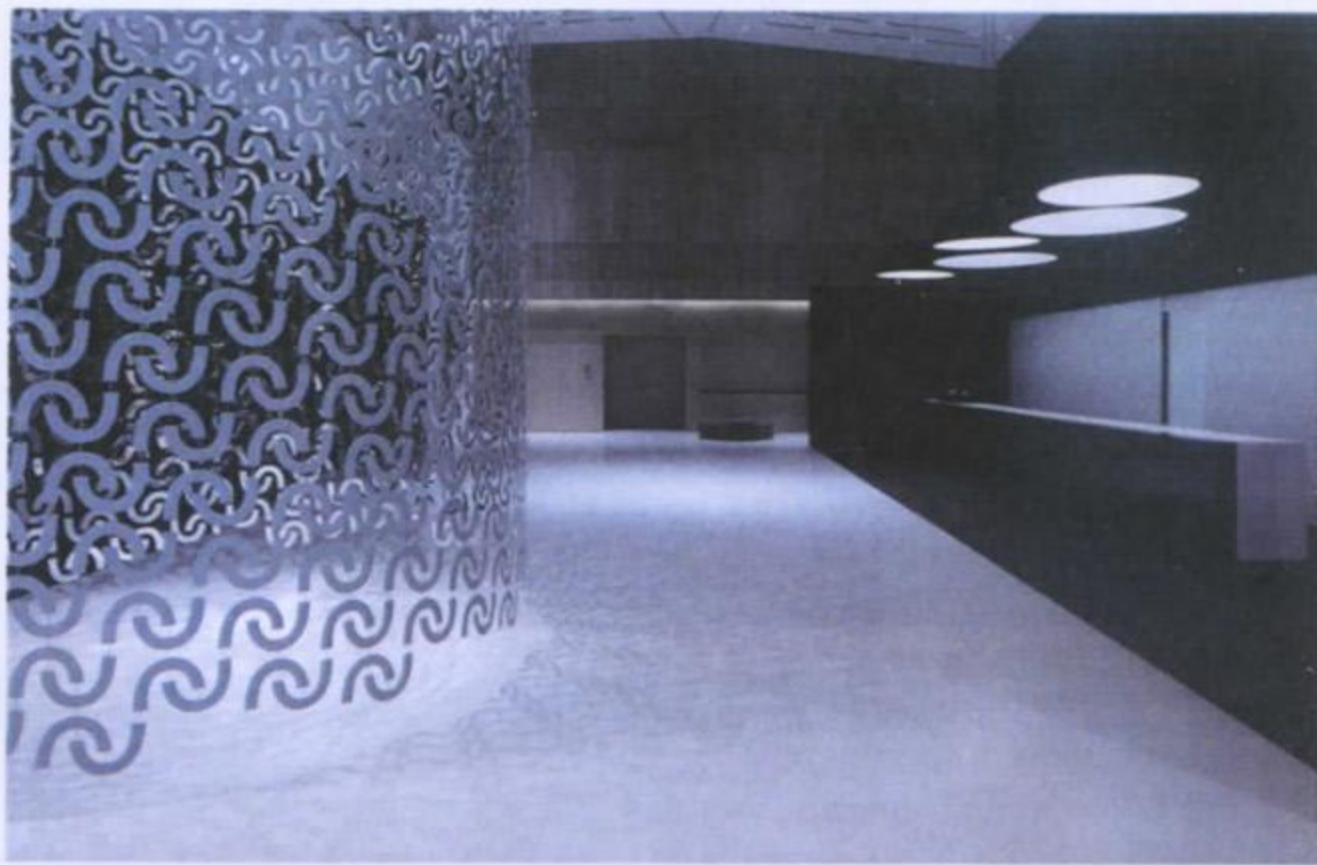

The Met Hotel, conveniently situated on the harbour of Thessaloniki, consists of total 212 guestrooms and suites affording great city and port views. It also houses 13 meeting rooms accommodating up to 750 people, gourmet restaurants, atmospheric bars, a fabulous spa, a comfortable VIP lounge and other facilities and services that ensure an unforgettable stay. Two restaurants, 'Chan' designed by Andy Martin and Avenue 48 provide Pan-Asian and contemporary cuisine. Besides, the Long Bar and the Sky Bar on its roof garden feature a cosmopolitan atmosphere, panoramic views and hip music. In the Spa, the design language is kept simplistic and edgy, where exist indoor heated swimming pool with hydrotherapy, Jacuzzi, steam rooms, solarium, hair salon, fully equipped treatment and massage rooms.

There is a strictness and seriousness expressed in the interiors which is put forward through the straight edge clear cut furniture combined with artistic accessories and dynamic artwork. Every interior has the same design approach, maximizing and minimizing the levels of intensity according to its function. In the corridors leading to the bedrooms we experience volume and warmth through the structural wood panel forms. Arriving inside the bedrooms, there is the presence of wood, lacquer and glazing. Three finishes combined with smooth fabrics to create a luxurious but approachable space. Just looking around the lobby, you will only recognize items and furniture from high enders.

The Met Hotel is a leading example to contemporary design. It has form, ambience, luxury, sexiness and comfort. A building that understands the language of the visitor and the essence of a very important word in the Hotel industry 'exclusive design'.
